SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

MEMORANDUM

DATE: September 30, 1983
TO: Engineering Managers and Supervising Engineers
FROM: Sanford M. Weiss, Director of Engineering /s/ SMW
SUBJECT: Pending Banking Applications

Rule 1309(f) requires that a preliminary written decision be made on banking applications no later than 180 days after deemed complete. An application must be deemed complete within 30 days of the date of receipt unless a request for additional information is made in writing.

Please make sure that all banking applications are acted upon within this required time period. If an application is older than the time allowed, please expedite the processing of this application so that we attempt to meet the letter of the law.

We are now formally giving permits to the first two companies, Bengt Trumpet Company and Pacific Press. Since we are in the process of granting permits even though they be conditional, we no longer have an excuse for not processing these applications in an expeditious manner.
